

Aero Sarathi – Complete Business & Product Document

1. Company Overview

App Name: Aero Sarathi

Company Name: Indo Chariot Pvt Ltd

Objective: Build a taxi aggregation and fleet-based service focused on Punjab domination, airport routes, and intercity travel.

2. Business Model

Revenue Model includes ride commissions, fleet earnings, and dynamic pricing.

Company-owned cars financed through EMI model.

Cost Structure: Fuel, EMI, Driver Salary, Toll Charges.

Driver payout can be per ride or percentage-based split.

3. Driver Acquisition Strategy

Hire drivers via local unions, driver networks, and aggregator platforms.

Convert Ola/Uber drivers by offering better earnings, fixed salaries, and incentives.

Provide stability vs gig uncertainty.

4. Pricing Insight

Punjab to Delhi Airport rides range approx ₹2000–₹6000 depending on category and demand.

Dynamic pricing and route optimization required.

5. App Features (Based on Ixigo-style system)

Booking system with pre-scheduled rides.

Cancellation & refund policies.

Driver allocation logic.

User wallet and payment integration.

Real-time tracking.

6. Legal & Branding

Suggested name finalized: Aero Sarathi.

Company structure: Private Limited.

Trademark check required before finalizing.

Ensure no copyright conflicts.

7. Expansion Strategy

Phase 1: Punjab dominance.

Phase 2: North India expansion.

Phase 3: Multi-city and airport routes.

Build strong fleet ownership.

8. Funding & Operations

Initial capital required for fleet financing.

Potential funding sources: NBFCs, SIDBI, private investors.

Maintain operational hubs in key cities.

9. Future Vision

Build a strong Indian brand competing with Ola/Uber.

Focus on reliability, pricing, and driver satisfaction.

Long-term possibility of EV fleet integration.
